

YES NEWS! August 2007

What's New:

The **YES** team continues to develop its Grade nine content. New lessons have been posted in the areas of Geometry, and Statistics and Probability. Recently added lessons now have a "NEW!" label on the lesson menu. We have also added a rollover to the main menu buttons listing all the lessons within that area to help users more efficiently navigate the site.

Be sure to take a look online at some of the fun interactive problems we have developed for each lesson such as the Data Analysis puzzle to the right.

What's Next:

Over the next few months, we will be making some changes to the **YES** website:

- Refining the site structure of the website to allow faster and more efficient location of information and lessons.
- Updating the list of glossary terms.
- Updating each lesson by adding an interactive quiz component.

We will also continue to add new lessons to the grade nine math library. Some upcoming lessons to look for include:

- Illustrating Algebraic Equations
- Checking our work with the Pythagorean Theorem
- Factoring Polynomials

We would like to thank-you again for your support and we would love to hear from you! Please send any feedback to info@youtheducationservices.ca
