

YES NEWS! October 2007

What's New:

Illustrating Equations is a new lesson in the Algebra section and one of our most illustration and animation rich lessons to date. Students should have fun putting their algebra skills into practice while helping their horse get over a series of jumps in the interactive problems section.

What's Next:

The YES team continues to look for ways to improve the **YES** website. Future plans include:

- Adding a search feature to the glossary terms.
- Updating each lesson with an interactive quiz component.
- Refining the site structure of the website to allow faster and more efficient location of information and lessons.

The grade nine math library is continuously being added to, with upcoming lessons focusing on:

- Exponent Laws
- Working with Polynomials
- Solving Right Angle Triangles

Thank-you once again for your support and, as always, we look forward to hearing from you! Please send any feedback to info@youtheducationservices.ca
